**SCADATA Scientific Announces New Distribution Partnership**

FORT WAYNE, IN — SCADATA Scientific, LLC, has recently executed an agreement with Precision Systems, Inc., located in Calumet City, IL. This agreement will allow Precision Systems to exclusively distribute Scadata products & services throughout the United States for the Water & Waste Water vertical market. Precision Systems will be introducing the Scadata product line at the WEFTEC (Water Environment Federation Technical Exhibition and Conference) in New Orleans from October 4-6, 2010.

SCADATA Scientific is a technology company that synthesizes the latest in communication and data transfer technologies to deliver information and critical data to wherever the end-user needs that information. Scadata manufactures products that specifically control, monitor, and alarm systems for municipal, water & waste water, oil and gas, and industrial applications in process and infrastructure monitoring and control. For more information, visit [www.scadata.net](http://www.scadata.net).

Calumet City, IL - Precision Systems, Inc. is a privately owned manufacturing company located in the southern suburbs of Chicago that develops, manufactures, and distributes products for the Water & Waste Water market. The products have the basic design goal of aiding the owner/operator of the product in the performance and execution of his work while increasing his safety. Precision Systems sells their products throughout the United States via manufacturers representatives. For more information, visit [www.precision-systems.com](http://www.precision-systems.com).
