

SCADATA

SYSTEM PROPOSAL AND SET-UP QUESTIONNAIRE

Use this sheet to outline the features and functionality that you want to get from your Scadata System. You can make it precise, or make it a wish list. You may have all the available transducers and outputs to do all you need, or, you can ask us to include those items such as: Phase monitors, current sensors, control relays, rain gauges, floats, and more. Remember, anything can be changed or revised at any time, on the fly. Set-up and configuration is the same way. We can configure and set up your system, or we can help you do it your self. But the greatest feature of Scadata is that it changes with you. Every Scadata system has all the features, and anything can be changed or updated anytime you wish

Please call Toll Free with any questions at 260.373.0100, Fax - 260.482.4020

Number of sites. Ex: lift stations, wells, flow meters:

Number of Water Storage tanks:

Number of Waste Treatment plants:

Number of Fresh Treatment Plants:

Number of Combined Sewer Overflow Sites:

Scadata Software Suite (S3) includes the following features and more. Please indicate which features that you wish to utilize immediately:

MONITOR

ALARM

TREND GRAPHS

CONTROL

REPORT

CHART RECORD

What is the typical number of inputs per site? _____

What is the typical number of control outputs per site? _____

Will you use automated control features? _____

If yes, what functions will Scadata be controlling? _____
